

Intergenerational Transmission of Breast Cancer Health Inequities

**Informational Webinar for
Prospective Applicants**

Agenda

- The California Breast Cancer Research Program (CBCRP)
 - CBCRP Program-Directed Initiatives
 - Preventing Breast Cancer Initiatives (PBC)
- Intergenerational Transmission of Breast Cancer Health Inequities
 - Overview
 - Research Questions and Suggested Approaches
 - How Grants are Evaluated
 - Important Dates
- Resources for Submitting an Application in SmartSimple

California Breast Cancer Research Program (CBCRP)

- Founded in 1993
 - breast cancer activists, scientists, clinicians, state legislators, and University of California officials collaborated to win passage in the state legislature of the California Breast Cancer Act.
 - funded by a tax on tobacco products, voluntary state personal income tax form check-off, and individual contributions.
 - tax check-off has drawn over \$13 million for breast cancer research.
- Grown to become one of nation's largest state-funded breast cancer research effort
- Among the largest breast cancer research funders in the world
- Ninety-five percent of our revenue goes directly to funding research and education efforts

Mission: to prevent and eliminate breast cancer by leading innovation in research, communication, and collaboration in the California scientific and lay communities

Since 1994, CBCCRP has funded

- Over 1,200 grants
- Totaling over \$290 million
- To over 840 academic & community researchers
- At over 140 institutions across the state

Program-Directed Initiatives

Vision

To identify and support research strategies that increase understanding of, and **create solutions to**, environmental links to breast cancer and fundamental causes of health disparities in breast cancer.

Goals

- Support a coordinated statewide effort to explore innovative ideas and new theories
- Leverage California's unique and diverse geographic and population resources
- Undertake critical studies that significantly move these fields forward

First round launched in 2004; second round in 2010

Preventing Breast Cancer (PBC):

Community, Population, and Environmental Approaches

In 2015

CBCRP's Council approved a third round of Program Initiatives, devoting 50% of funds (~\$20 million) to:

- Identify and eliminate **environmental contributors** to breast cancer
- Identify and eliminate fundamental causes of **health disparities** with a focus on breast cancer in California
- Develop and test **population-level prevention interventions** that incorporate approaches to address the needs of the underserved and/or populations experiencing disparities in the burden of breast cancer

In 2020 and 2021

CBCRP's Council approved 10 concept proposals to stimulate research in these three areas, including:

- *Intergenerational Transmission of Breast Cancer Health Inequities*

Intergenerational Transmission of Breast Cancer Health Inequities Overview

Overall Aim: To examine whether intergenerational transmission of breast cancer susceptibility can be influenced by environmental exposures (e.g. chemical exposures; multi-level exposures to social determinants of health).

Studies will be viewed as responsive if they employ community-partnered participatory methods and are any of the following types of studies:

- Approach 1: epidemiology studies with stored biospecimens from earlier in life (e.g., prenatal period) and outcomes or strong intermediate markers in a least one subsequent generation;
- Approach 2: epidemiology studies that can utilize a mixed methods approach to analyze qualitative and quantitative data around intergenerational social determinants of health at the individual and community level;
- Approach 3: studies with access to one generation and breast cancer incidence outcomes in at least one subsequent generation.

Intergenerational Transmission of Breast Cancer Health Inequities Overview

Available Funds:

CBCRP intends to fund up to three projects with a duration of three to five years maximum at a maximum total direct cost of \$300,000 for Approach 1 and \$425,000 for Approaches 2 or 3.

Eligibility:

- Any individual or organization in California may apply.
- The research must be conducted primarily in California.

Intergenerational Transmission of Breast Cancer Health Inequities

Research Teams:

- Up to 3 community-partnered participatory research teams
- Each team will need at least one community Co-PI and at least one academic Co-PI.
 - Community-level stakeholders (e.g., residents, community leaders, community-based organizations)
 - Academic partners with relevant experience and expertise for the proposed project
- Interdisciplinary teams recommended with expertise in with expertise in breast cancer epidemiology, social science and intergenerational modeling in collaboration with community stakeholders.

Community-Partnered Participatory Research

- An **equal** partnership between academic Co-PI and community Co-PI
- Partnership works together to:
 - Identify the research question
 - Develop the research plan
 - Carry out the research
 - Interpret the results
 - Disseminate the results

The CPPR team

Academic Co-PI & Staff

Community Co-PI, Staff, Clients, Community Members

Intergenerational Transmission of Breast Cancer Health Inequities - Research Questions

For this funding opportunity, we are interested in at least two generations, with exposure taking place in one generation and outcomes in at least one subsequent generation.

- Is the unequal burden of breast cancer seen in BIPOC influenced by intergenerational transmission of risk through early life exposure to specific environmental chemicals?

AND/OR

- Is the unequal burden of breast cancer incidence and/or mortality explained by persistent intergenerational macro and meso level social forces? Analysis of upstream causal factors include structural policies that contribute to systematic unequal access to resources (e.g. wealth, employment, education, housing, healthcare, etc.) and the built environment.

Approach 1 - Epidemiology

Suggested approaches include an epidemiology study with any or a combination of the following designs:

- Examine associations between early-life exposures to environmental chemicals and breast cancer risk (or intermediate markers for breast cancer risk) in F1 generation, if stored biospecimens from F0 generation during pregnancy are available.
- Examine associations between exposures to environmental chemicals during a WOS (pregnancy) and breast cancer risk in F0 generation, if stored biospecimens from F0 generation during pregnancy are available.
- Examine associations between exposure to environmental chemicals in early-life and intermediate markers of breast cancer risk in F2 generation, if stored biospecimens from at least F0 or F1 generations are available.
- Examine whether the associations are stronger after considering social macro-level forces related to health inequities like socioeconomic status (interaction model)
- Conduct intergenerational studies of community health with documented chemical exposures (e.g., dumping).

Approach 2 – Mixed Method Analytical Approach

Social Epidemiology and Economic Evaluation

Use existing cohort studies with quantitative and qualitative data that can access at least two generations within families to examine intergenerational effect of systemic inequities to:

- Apply conceptual frameworks for studying intergenerational health disparities that focus on macro-level determinants including policies affecting income, housing, education, and wealth transmission.
- Identify specific intergenerational socio-ecological determinants of breast cancer risk; elucidate using social science conceptual approaches like pathways models and evaluations including multilevel economic models.
- Examine historical events or man-made (including environmental racism) or natural disasters that can leverage data on exposure to events and breast cancer outcomes across F0 and F1 generations
- Examine associations between trauma experienced by F0 generation and breast cancer risk in F1 generation; assess breast cancer risk in F0 generation as well.
- Examine whether associations are stronger if F0 trauma occurred earlier in life.

If possible, studies should oversample vulnerable populations that are traditionally impacted by social inequities.

Approach 3 – Case Control of Breast Cancer under 45

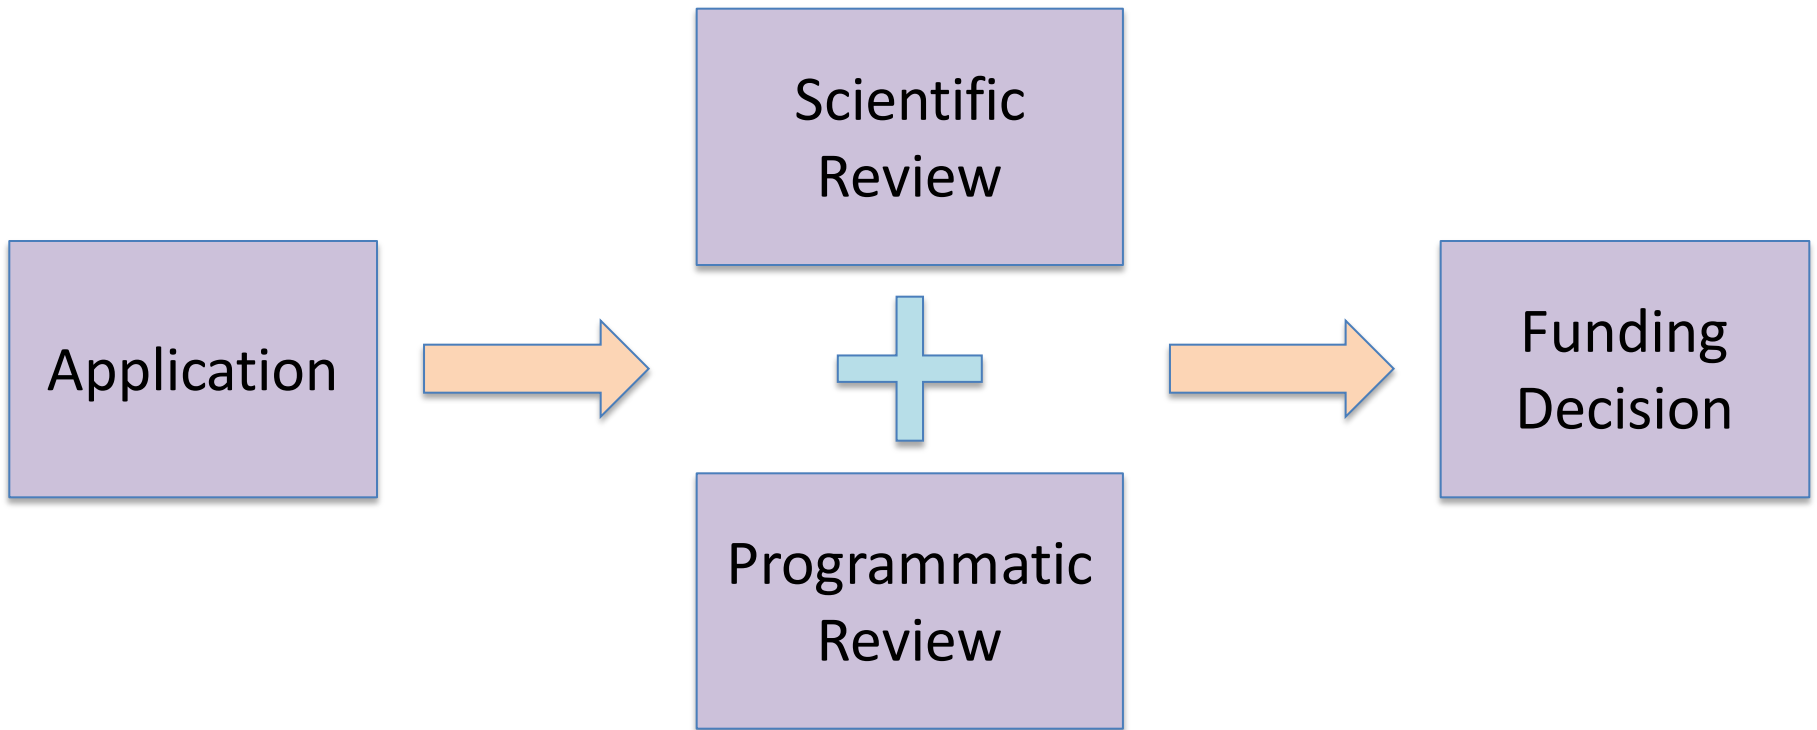

Create new de novo retrospective cohorts that can access at least two generations within families to examine intergenerational transmission of inequities. Sampling based on F2 breast cancer status with any of the following suggested designs or combinations of them:

- Apply the same study design aims as Approach 2.
- Recruit F2 women with and without breast cancer with documented environmental exposures at the community level of inequitable environmental exposures (e.g., dumping).
- Collect lifecourse data on F2's mother (F1) and grandmother (F0).
- Establish potential for assessment of breast cancer risk in the F3 generation based on intermediate markers of risk.
- Assess epigenetic factors in biospecimens
- Collect data on paternal exposure

Intergenerational Transmission of Breast Cancer Health Inequities Dissemination Plan

- Proposals must include a dissemination plan and should discuss if the dissemination plan will be ongoing throughout the project or at the end and justify the frequency of the dissemination elements.
- Each plan should specify who on the project will be part of the dissemination team, who will be the target audience including non-research audiences, especially community members, practitioners and policy makers.
- The dissemination plan requirements should take into account audiences, messages, channels, milestones, and appropriate resources to reach milestones.
- Given the focus of this project on understanding the potentially large undercounting of risk based on intergenerational transmission, communication to both clinical and public health practitioners as well as policy makers is essential.

Two-Tier Evaluation Process

Intergenerational Transmission of Breast Cancer Health Inequities: Review Criteria

	Criteria
Scientific Review	<ul style="list-style-type: none">• Partnership• Community Benefit• Quality of the Research• Feasibility
Programmatic Review	<ul style="list-style-type: none">• Responsiveness• Lay Abstract• Diversity, Equity and Inclusion• Community Involvement• Dissemination and translation potential

Application Components

Form/Attachment	Requirement
Lay Abstract	Required (Prog Rev)
Scientific Abstract	Required (Prog Rev)
Budget and Justification	Required
Research Plan	Required
Program Responsiveness	Required (Prog Rev)
Collaborative Agreements	Required (Prog Rev)
Biosketches	Required (Prog Rev)
Facilities	Required
Human Subjects	Required
Appendix	Optional

Important Dates

	Date
Applications due	March 2 2023 (12 pm noon PT)
Notification of funding status	July 1, 2023 (<i>at the latest</i>)
Project start date	August 1, 2023

Questions?

How to submit a proposal in SmartSimple

Research Grants Program Office (RGPO) Contracts and Grants Unit (C&G)

- C&G works in collaboration with CBCRP, serving as interface on administrative and procedural aspects your **Application** submission and review process.
- Contact information:
 - **Email: RGPOgrants@ucop.edu** (Best method)

Key Dates & Tips

Award Type	Application Deadline
Investing in Communities' Local-Level Needs to Reduce Racial Disparities in Breast Cancer: Phase 1	March 2, 2023, 12pmPT
Novel Approaches to Predict or Prevent the Influences of Environmental Chemicals on Breast Cancer Risk	March 2, 2023, 12pmPT
Intergenerational Transmission of Breast Cancer Health Inequities	March 2, 2023, 12pmPT

- All materials must be submitted through SmartSimple
- Detailed instructions are provided on the CBCRP website and in SmartSimple
- **Start early** to become familiar with SmartSimple
- **Submit early**: No late applications will be accepted

Accessing SmartSimple

Login to SmartSimple: <https://rgpogrants.ucop.edu/>

The image shows a screenshot of the SmartSimple login page. At the top left, the University of California logo is visible. The main content area is divided into two sections. The left section, titled 'Welcome to Research Grants Program Office | UCOP', contains introductory text about the RGPO and information about the SmartSimple system. The right section, titled 'Login to SmartSimple', contains a login form with fields for 'Email:' and 'Password: Enter Password', a 'Login' button, and a 'Forgot Password?' link. A red oval highlights the login form, and a red arrow points from the 'Returning users login here' callout to it. Below the login form, there is a 'Principal Investigator Registration' section with a 'Register Here' button, which is also circled in red. A red arrow points from the 'First-time users register here' callout to this button. The background of the page features a blurred image of a woman's face looking upwards against a starry night sky.

Welcome to Research Grants Program Office | UCOP

The Research Grants Program Office (RGPO) oversees a broad grantmaking portfolio of over \$100 million a year to support research that is critical to California, the nation and the world. RGPO programs enhance University of California's research capacity and excellence, which helps attract top faculty, graduate students, government funding and companies to our state.

The SmartSimple Grants Management System is now accepting letters of intent (LOIs) and applications for the Tobacco-Related Disease Research Program (TRDRP). For information regarding the 2019 call for applications, please visit TRDRP's website at www.trdrp.org

Available Funding Opportunities

List of available funding opportunities below includes both open and upcoming in the Pacific Time Zone.

#	Name	Description	Policies and Guidelines	Deadline	Application Deadline	Info	Apply
1	CBCRP 2020 - Innovative, Developmental, and Exploratory Award (IDEA)	The Innovative, Developmental, and Exploratory Award (IDEA) supports speculative, exploratory, high-risk/high-reward projects with a primary focus on breast cancer.	PLACEHOLDER_UPLOAD.pdf	10/24/2019 12:00:00	03/05/2020 12:00:00	Info	Apply
2	CBCRP 2020 - Translational Research Award	Translational research to be supported by the CBCRP should have the potential for major impact in the areas of: (1) diagnosis, or treatment of breast cancer; (2) reduction in the community burden of the disease in California, or (4) advances in systems changes, health policies or environmental factors that will impact public health outcomes. To distinguish this research from other types of research funded by the CBCRP, the applicant to present a "critical path" that follows a defined research continuum leading to clinical application.			03/05/2020 12:00:00	Info	Apply
3	CBCRP 2020 - Conference Award	The Standard Conference Award is open to researchers with the capacity to host an event that satisfies the criteria for Applications.			03/04/2019 12:00:00	Info	Apply

1. Click on the **“Available Funding Opportunities”** tab in the upper right corner.
2. Find the row that corresponds to the award you’re interested in and click **“Apply.”**

Application Submission

Instructions can always be downloaded at the top of each page.

Complete each section of the application. (“Save Draft” frequently to save entered information; review & edit as needed.)

Inviting Co-PI to an Application (or other roles with Edit/View Access)

The screenshot shows the University of California application management interface. The top navigation bar includes 'UNIVERSITY OF CALIFORNIA', 'Privacy & Security', and 'Nancy Chamberlain_External Ap...'. The main content area is titled 'B26BB1411 RGPO Test CBCRP CRC Pilot'. A left-hand sidebar contains 'Main', 'Notes', and 'Invite Personnel' (highlighted with a red box and a red circle with the number 1). The main content area has an 'Add Personnel' section with an information icon and a red circle with the number 1. Below this is a table with columns: Prefix, First Name, Last Name, Email, Role, and Status. The table contains two rows: one for Nancy Chamberlain (PI Assistant, Invited) and one for Nancy Chamberlain-External Applicant (Co-Principal Investigator, Accepted). A red box with a red circle with the number 2 highlights a '+' button in the bottom left of the table. At the bottom of the table, there are 'Save' and 'Invite' buttons, with a red box and a red circle with the number 3 highlighting the 'Invite' button.
